

OWN THE RED ZONE

with OpenDrives' High-Performance Video & Rich Media Storage Management Workflow Solutions

In football, every second counts—both on the field and in the edit suite. When you're managing massive 4K and 8K ingest from dozens of cameras during a live broadcast, you don't just need storage; you need a high-performance engine that can handle the "two-minute drill" of game production.

OpenDrives was built to withstand under pressure. We provide the ultra-low latency and massive throughput required to move content from the sidelines to the fans in record time. Whether you're cutting game-day coverage/highlights or social clips in real-time or mastering the next award-winning documentary, our on-premises or public cloud solutions scale with your needs.

Some of the Customers Who Trust OpenDrives

Customer Testimonials

“ Director of Content Production, Los Angeles Kings
By 2019, it became obvious that the growing pains we were experiencing weren't worth it anymore and wouldn't return dividends. I wanted more fluidity with our data. That's when I knew we needed a new solution. I've never had a problem OpenDrives couldn't fix.”

“ Cincinnati Reds
OpenDrives just works, and that's what really matters when the pressure's always on. Since purchase, the Reds have never experienced any problems.”

“ VP of Field Operations @ Engineering, FOX Sports
Consolidating hardware and software systems becomes increasingly crucial with every camera we add to the field...This has put tremendous demand on data transfer to ensure Fox Sports continues to deliver the best viewer experience possible— OpenDrives' efficient, flexible software and hardware solutions have proven critical to helping Fox Sports achieve this.”

OWN THE RED ZONE

with OpenDrives' High-Performance Video & Rich Media Storage Management Workflow Solutions

Why do professional sports teams, leagues, and networks choose OpenDrives?

Professional sports workflows need creative storage veterans, not rookies. Production stakes are higher during live games; multiple editors need immediate access to files and often have to share and collaborate across remote locations. Blank screens and slow time-to-delivery are unforgivable. Don't let production stall out on the 1-yard line. With OpenDrives, every second of the action gets captured and delivered with the speed of the game.

OpenDrives is Your Storage Management Workflow Partners for Best-in-Class Video Production

OpenDrives Advantages

- **Unrivaled Speed:** Say goodbye to dropped frames and rendering lag.
- **Unlimited Capacity:** Grow your capacity without increasing the price.
- **True Collaboration Without Disruption:** Allow your entire production team—social, editorial, and archive—to access the same high-resolution footage simultaneously.
- **Built by Creative Experts:** Experience a media-centric workflow solution (not general purpose) whether you choose OpenDrives on-premises or in the cloud.
- **Extends Your Current Workflow:** Integrates with your critical applications or connect on-premises with the cloud via hybrid mount or hybrid access.

Ready to take command over your game-day productions? You have nothing to lose, but the lag time that's holding your team currently back.
