

# Maximize the Benefits of Public Cloud Storage

Accelerate workloads with hybrid storage capabilities in a fully managed service

## The Choice Shouldn't Be On-Premises or Public Cloud

Why choose between on-premises and public cloud storage when you can take full advantage of the benefits of each, but without the operational hassle of complex hybrid-cloud architectures? Enable seamless and accelerated movement of your corporate data between both environments with simple, unified management and optimization provided by a turnkey service backed by storage experts. You decide which workloads to retain on-premises while shifting others to the cloud, depending on the immediate and changing needs of your business.

Powered by our powerful Atlas Core software, Atlas Cloud Plus virtualizes an on-premises storage solution in the public cloud. This is a fully managed service delivered by OpenDrives professionals who know storage solutions and how to accelerate enterprise workflows. Maximize the benefits of public cloud storage with a CapEx-friendly managed service that's equally easy on your operational budget.

## Key Features

The key features and functionality you can expect from this solution include:

- A solution powered by Atlas Core, our highly efficient data-handling software that drives all our performant on-premises storage solutions with a consistent end-user experience.
- Seamless data access and movement between on-premises and public cloud environments so your data is always where your organization needs it.
- Fully managed service that assesses and deploys the solution for you, delivered by storage and workload experts with years of experience managing enterprise storage solutions.
- Ongoing maintenance, break-fixes, and upgrades that won't defocus your IT staff from higher-value activities.
- Optimization cycles to ensure that the solution is always working the way your organization needs it to operate—a total commitment to high-value outcomes and success.

## Tangible Value To Your Organization

- Predictable OpEx model that lightens your organization's CapEx burdens.
- An OpEx model designed to give you hybrid cloud capabilities in a predictable billing model.
- A fully managed service that assesses, deploys, and manages the solution for you, so your core business isn't defocused by ongoing administration.
- Your enterprise data always in the right place (on-premises or public cloud) so that your company more immediately benefits from the insights and innovation that data provides your company.

## Let's Talk About Your Needs

Reach out to us today so we can listen to your organization's needs and tailor our discussions and demonstrations to the features and functions you need most.
